---

Good morning,

Pre-RD, Global and NRC are currently stationed at SIL boat ramp. The crew is on standby until the required decon- compatible suites arrive (estimated to take approximately 2hours ~11am). A health and safety meeting was held (photo 1) to brief the crew on diving procedures and boat hazards. Included below are photos of; AED, life ring, backboard, potable water for the divers, and air tank.

The crew has decided to go grab coffee in the meantime. NRC and I will stay at SIL with the loaded vessel during this time, and regroup in an hour.

Thanks,

Jonni
